

RESTORE YOUR FUEL
PROTECT YOUR INVESTMENTS
REDUCE YOUR COSTS
IMPROVE YOUR PERFORMANCE
PRESERVE THE ENVIRONMENT

The efficiency of your fuel and its impact on your assets significantly impacts your bottom line. There are numerous ways your fuel can be degraded and they often go undetected. Degraded fuel results in inferior performance and unnecessary downtime and maintenance costs.

Green Fuel Max (GFX) is a high performance diesel fuel additive specially formulated to improve fuel efficiency, protect your investment, and provide ongoing optimization for your fuel system. A completely organic product, GFX offers an all-in-one solution that is both highly effective and environmentally safe.

TREAT YOUR FUEL WITH GFX:

- Eliminates and protects from the Diesel Bug and other bacteria
- Removes water from fuel
- Improves fuel consumption
- Cleans injectors
- Improves performance
- Enhances lubricity
- Stabilises fuel
- Cleans tanks
- Controls deposits
- Inhibits corrosion

HOW IT WORKS

Using a complex proprietary blend, GFX controls the formation of undesirable compounds in fuel that contribute to the formulation of engine deposits. It also enables the complete dissolution of any water in the fuel through a unique solubilisation process. GFX consists primarily of surfactants, oxygenates, and corrosion inhibitors.

DEGRADED FUEL IMPACTS FUEL CONSUMPTION AND SHORTENS EQUIPMENT LIFE.....

GFX CAN HELP

Water and other contaminants are a major cause of fuel degradation

GFX eliminates one of the prime causes of fuel problems – water in the fuel. Transport, storage and decanting create numerous opportunities for water to infiltrate the fuel supply. In high humidity environments, condensation alone can allow water in the fuel supply. This creates the ideal environment for the rapid growth of bacteria and other contaminants.

Left untreated, your fuel system becomes susceptible to corrosion, engine deposits, and bacterial infestation including the Diesel Bug.

As soon as it is introduced, GFX will start killing every organic contaminant in the system. It will mobilise sludge deposits in storage tanks, and remove deposits from the entire fuel system. Ongoing use of GFX will continue to protect your fuel and your fuel system from the harmful effects of water and other residuals.

AUSTRALIAN MADE

A proven solution

GFX PROVIDES RESULTS AT TREATMENT RATES OF 1L: 4000L OF FUEL.

It has been independently tested and proven to reduce the cost of fuel, reduce emissions, and extend the working life of your assets. Now, widely used in Europe and Asia Pacific, GFX delivers a cost-effective and environmentally safe solution to the problem of increasing fuel and maintenance costs.

Where can GFX be used?

- Trucks / Vehicles
- Boats and other diesel powered vessels
- Diesel generators
- Fuel storage tanks
- Excavators
- Chainsaws & Logging equipment
- Motorcycles
- Any Diesel or Petrol powered engine

FEATURES:

- Completely oil/fuel soluble
- Stable in the presence of water
- All natural and non-toxic; no chemicals
- Contains no hydrocarbons, sulphur, phosphorous or metallic ingredients
- Burns completely to carbon dioxide
- Non-corrosive
- Bio-degradable
- pH neutral
- Does not impact the octane rating or viscosity of your fuel
- No flammable chemicals
- Approved for transport by air & does not require a UN number

DIRECTIONS FOR USE:

Apply directly to fuel tanks in the recommended dosage.

Please contact us to discuss your requirements. We can assess your situation and provide a recommendation on your initial and then ongoing dose requirements.
